

SHOWSHAK

DISCOVER · TRUST · WATCH IT

The trust layer for what to watch — curators clip what's worth your time, you tap **Watch It**, you land on the right platform.

PRE-SEED · INDIA 2026

INFINITE CONTENT. ZERO CONVICTION.

16 MIN

an Indian viewer burns **browsing, not watching** — every single session

69%

of Indian OTT subscribers are **frustrated** just trying to find something to watch

148M

paying subscriptions split across **15+ platforms & 13+ languages** — the fragmentation behind the paralysis

Algorithms guess. Search needs a title you don't have. So the decision falls back to the oldest instinct there is — **asking someone whose taste you trust.**

THE SOLUTION

THE PERSON YOU TRUST, AT THE SCALE OF A FEED.

A curator clips a show. You feel it. You trust them. You tap **Watch It** — and land on the right platform in one move.

- **Creator first.** You connect with a curator's taste before the title — so trust leads the decision.
- **One action.** Every clip builds to a single tap, at the emotional peak.
- **The bridge.** We carry people to Netflix, Prime, JioHotstar — the trusted top of the funnel for all of them.

THE MOMENT IS HERE.

148M

Choice broke

148M paying streaming subscriptions in India, fragmented across 15+ platforms and 13+ languages. Deciding what to watch is genuinely overwhelming.

67%

Trust moved to people

Viewers 18–34 now rank a person they follow as their most trusted source — ahead of search and ahead of the platform's own algorithm.

AI RACE

The giant confirmed it

JioHotstar + OpenAI shipped ChatGPT discovery to fix "what to watch." The #1 player is paying to solve our exact problem — with a machine guess, where we bring human trust.

THE BUDGET BEHIND EVERY "WATCH IT."

INDIA PROMOTION ECONOMY · ~₹6,000-10,000 CR/YR

streaming marketing + subscriber acquisition + film P&A + influencer (~\$0.7-1.2B)

SERVICEABLE · ~₹2,000-4,000 CR

the trust-discovery slice we can serve (~\$240-480M)

OUR TARGET · ₹200-400 CR

~10% of the serviceable market at maturity

Studios and platforms spend relentlessly to make people watch. One tentpole now spends **\$100M+ on marketing alone.**

Same buckets, worldwide → ~\$50B+/yr. India is the beachhead; the playground is global.

Bottom-up, triangulated: FICCI-EY 2026, WPP Media 2026, Kofluence 2026, Netflix & studio marketing disclosures. Ranges, not point estimates.

THE TRUST NETWORK FOR WHAT TO WATCH.

JustWatch turned where-to-watch data into a profitable, studio-funded business. Letterboxd turned film taste into a 29M-strong

JustWatch: 65M+ users/mo, profitable since 2016 (JustWatch). Letterboxd: ~29M users, 2026 (TIME & Tiny).

FAMILIAR TO USE. IMPOSSIBLE TO FAKE.

Fire

The like, reimagined — "this is lit." A reflex, never a public scoreboard.

The clip

The curator's pitch leads; the title reveals only at the moment of decision.

Watch It

One tap to the right platform, in your region. Private. Instant.

Follow & Stacks

Build a roster of curators you trust, and collect what's next.

Shipped and live as an installable app — real curators, real clips, real

Watch lists, real follow, real trust. The mission is simple: to build a

BUSINESS MODEL

WE SELL INTENT — AT THE MOMENT OF TASTE.

1

Promoted clips · native title marketing

Studios fund curators to clip new titles. Looks organic, demand-independent, recurring with every release.

CORE

2

Performance acquisition for streamers

Pre-sold subscribers at peak desire. Streamers pay ~\$89 to acquire one — we deliver warmer, cheaper.

HEADLINE

3

Cross-platform taste intelligence

Each platform's mirror of the open market. High-margin, compounding, and ours alone to hold.

MOAT

4

Premium + curator monetization

Power-user tools and creator revenue — diversified, recurring, first-party.

LATER

BUILT TO COMPOUND.

Neutrality is the moat

Only a layer above every platform can hold cross-platform taste. A streamer that promotes rivals stops being itself — so this stays ours.

The taste graph deepens

Every fire, follow and Watch-It widens a dataset no single platform can see. Time makes the lead bigger.

Trust is earned, not bought

Our wedge is a behaviour — connect with the curator, then the title. That bond compounds with every honest recommendation.

We start with zero permission

Watch It runs on public links and open availability data. We launch, grow, and prove conversion on our own.

WIN THE HARDEST MARKET FIRST.

- **India is the beachhead.** The most fragmented streaming market on earth — the sharpest pain, the hungriest curators, the fastest proof.
- **Seed the loop.** Hand-pick a founding cohort, then grow to 50–100 curators posting weekly — the clips that make viewers return for the people, not a feed.
- **The organic rail becomes the paid rail.** Curators clip what's trending today; that same placement becomes paid promoted marketing as conversion is proven.
- **First revenue: regional platforms + film launches.** The services and constant slate of releases that need discovery most — and spend on it daily.

TEAM

BUILT BY THE BUYER.

Piyush Gupta — Founder

B.Tech (IT) and a performance marketer — managed ₹1 cr+ in Google Ads spend driving leads and sales for businesses, then built this entire live, property-tested product solo.

Bringing on

Streaming-industry partnerships to turn Watch-It proof into platform revenue, and senior engineering for multi-region scale.

ShowShak's customer is a performance marketer buying attention. I've been that buyer — I know exactly what converts and what they'll pay for.

RAISING ₹1 CRORE PRE-SEED TO PROVE THE LOOP.

It takes us to one clear milestone — 50–100 curators posting weekly and 2,000–3,000 viewers returning because they trust them — and the **Watch-It conversion data** that opens our first deal conversations with the OTT platforms.

Curators & content

Seed and support the founding curator cohort — the supply that makes an audience return.

Legal & entity

Counsel, operating entity, safe-harbour hardening — the clearance to go fully public.

Team

Partnerships + senior engineering — turn the beta into a measurable, fundable loop.

SHOWSHAK

The trusted bridge to
everything you watch.
